(54) Title: ANASTOMOTIC LEG ARRANGEMENT

(57) **Abstract:** A leg compacting system for compacting inwards a group of legs (228) of an anastomotic connector towards a central location thereof, comprising, a coupler for coupling to a delivery system on which said connector is mounted; and a plurality of leg confiners (820), said leg confiners (820) configured to selectively move in an inwards direction and said confiners configured to have a resting compacted configuration in which a space of between 7 and 1 mm in width is maintained between the innermost leg contacting sections of said confiners such that a graft vessel suitable for mounting on said connector can be passed between said confiners (820).
